# NITRO

## Universal Security Platform
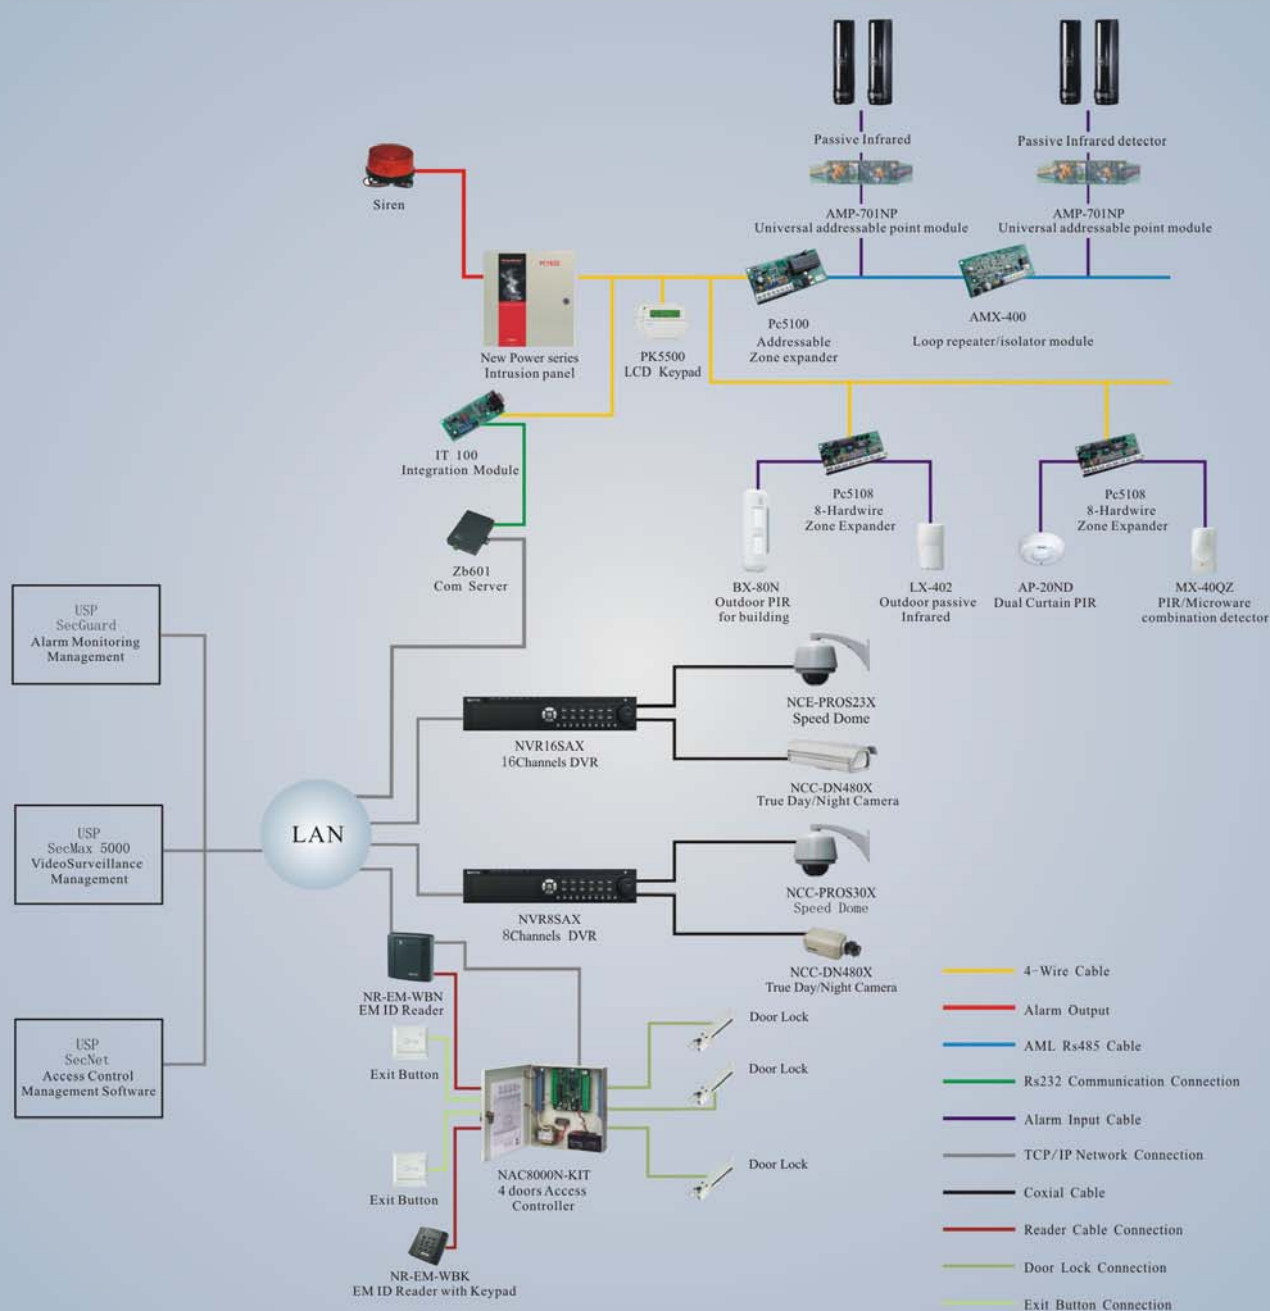

## USP SecNET

**Access Control Management Software**

* Integrate with SQL Server or MSDE
* Integrated with 3rd party system through serial port / TCP/IP
* Graphics Floor plan for controlling and monitoring devices.
* Provide Photo verification feature
* Batch card add and card delete
* Card Enrollment reader
* Different color real time events in viewer helps for monitoring.
* Database maintain tool. Provide utility for database backup automatically.
* The system provide interface for upgrading controller firmware
* Searching events according to event date/card holder/devices name and events type.
* Comprehensive Time & Attendance Analysis Tool.

## USP SecMAX

**Video Surveillance Management**

* Multi-monitor feature enable the display of videos from multiple camera and DVRs simultaneously.
* Powerful Search Capabilities - search recordings based on cameras, event trigger, date, time
* PTZ Control
* Remote DVR configuration and firmware uploads.
* Flexible to add extra streaming server
* Integrated with 3$^{rd}$ party system for event interlinking with Access Control and Intrusion System

## USP SecGUARD

**Alarm Monitoring Management**

* Support multiple alarm panels through serial port or TCP/IP connection.
* Advanced Server/Client technology to network multiple PC's together
* Remotely arm/disarm management and multiple level alarm management
* Graphical floor plan for alarm management and system control
* User can define the sounds for represents different alarm events.
* Each zone alarm have own sound for reporting
* Multi-user system with definable user level. Provide full reporting tools
* Integrated with 3rd party system for event interlinking.
* Complete Backup utility.
